

Print Solutions

Providing the complete
print solution

Romec

WELCOME TO PRINT SOLUTIONS

Romec Print Solutions specialises in providing a fit for purpose product, with the correct quantity at the right time.

This involves more than the traditional printing and dispatch to a single point; but taking time to understand individual requirements, plan, advise, assess options, design, print, finish and dispatch often directly to end users.

Companies can spend a high proportion of revenue on print related products and professional quality printed material continues to be a key element in the retention, development and winning of new customers.

Romec offers the complete range of printing solutions for stationery, forms, brochures, training aids, newsletters, posters, magazines and much more.

Using a wide range of equipment and processes the services offered include:

- **Project planning**
- **Design**
- **File preparation**
- **Colour printing**
- **Digital printing**
- **Long run**
- **Short run**
- **Single colour**
- **Multi-colour**
- **Mail merge**
- **Scanning**
- **Finishing**
- **Mailing and distribution**

Management from start to finish

From the moment you first contact Romec Print Solutions information is gathered on our Tharstern Print Management Software to enable estimates, quotes and job information to be swiftly and successfully produced.

This all links to an efficient system for live jobs, enabling stock to be allocated or ordered, production

to be notified and planned, jobs monitored throughout the process using data capture software to keep everyone up to date to within minutes.

When the job is completed the system generates labels and delivery notes and arranges invoicing as well as storing a full history of data and information.

We have a fully trained team that can not only interface with the MIS (Management Information System) but are available to talk, explain and plan projects for customers. To us each and every order is a project that needs individual attention.

Pre-press

Simple options and straightforward choices, all controlled by a specialist workflow system to ensure data generated from whatever source can be handled on our PC's or MAC's.

This ensures full data integrity for production of proofs in the pdf workflow to digital files to plates.

Our pre-press facility has the ability to:

- Offer a full design service
- Accept most types of files, including Quark Xpress, Photoshop and Illustrator plus many more
- Merge data
- Provide proofs
- Produce print-ready plates

Press or digital?

We cannot understand why this is still an industry wide question.

Romec has had the answer for over 10 years, neatly integrating digital equipment and litho presses. Both types just link into the production schedule and our experienced job handlers use the MIS to establish the most cost effective production method for the run length, quality requirements, specification and delivery time scales.

The equipment is there for people and planning to make the difference.

With 9 litho presses and 6 digital machines the options and choices for producing cost effectively are further increased with the operation of a high speed min web press.

With such a wide range of machines we have options and choices that other operations dream about and it's our customers who can sleep easy.

Finishing

A strange historical term; for Romec the finishing is not the end but merely a step in the chain along the way to meeting customer requirements.

As you would expect from a modern well-equipped production setup, a wide range of print finishing options are available including:

- Booklet making
- Perfect binding
- Hole punching
- Folding
- Perforating
- Numbering
- Encapsulating
- Wiro binding
- NCR tip gluing

Distribution, stocking and storing

Whether you need a complex multi-mail out or simply a bulk delivery to one address we have it covered. Alternatively we can store your literature until you need it.

- Sent to one point
- Sent to multi points
- Stock and store
- Pick and Pack. This is located next door with our partner in a large warehouse complex

The environment

We care about the environment as much as anyone and have the same concerns as our customers.

We have been concentrating on environmental issues for a long time. Some of the steps taken are:

- Use of paper and board from carefully managed plantations
- Use of recycled materials where possible
- Reduction in use of harmful cleaning agents
- Reel ends given to local schools project for re-use
- Wash down rags sent for cleaning and re-use
- Metal plates recycled
- Silver recovered for image setter
- Pre-press chemicals filtered and cleaned for re-use
- Off cuts from guillotines sent for recycling
- All other waste segregated and handled by licensed waste contractors
